FRONTEND ENGINEER

5 years of experience at software companies, startups, agencies, and education platforms across SaaS, video technology, AI, and web services. Contributed to feature development, performance optimization, platform launches, cross-functional delivery, infrastructure improvements, and mentoring through instruction and collaboration.

EXPERIENCE

Frontend Engineer | Rhombus

September 2024 - November 2025, Sacramento, CA

Rhombus is a cloud-based physical security company.

- Delivered a multi-camera video interface that cut customer investigation time by streamlining tracking of people and vehicles across live video feeds.
- Led frontend development of a new guest management system, partnering across teams to bring the product from proof-of-concept to public launch.
- Optimized complex, video-heavy interfaces by eliminating UX friction and performance bottlenecks in rendering and interaction flows.
- Partnered with product, backend, and design teams to identify key product needs and deliver scalable frontend solutions.

Fullstack Engineer | Kiyo

August 2023 - September 2024, Remote

Kiyo is an AI-powered engagement platform for home professionals.

- Led the development of an MVP web application leveraging React and Next JS, delivering the original platform within a tight deadline of 3 months.
- Implemented performance and accessibility enhancements with Vercel analytics and Google's Core Web Vitals, improving page load times by 50%.
- Translated intricate Figma mockups into interactive and responsive user interfaces with React and Tailwind CSS, ensuring seamless user experiences and adherence to the website design specifications.
- Implemented Agile methodologies to enhance project delivery speed and collaboration, resulting in a ~30% reduction in development time.

Software Development Instructor | CodeWizardsHQ

May 2022 - August 2023, Remote

The leading online coding school for ages 8-18.

- Instructed a diverse array of courses including Basics of the Web (HTML, CSS, Javascript), User Interfaces (React, UI/UX, accessibility, performance) and Web Applications (Python, Flask, MySQL)
- Simultaneously managed 10-20 classes with 5-10 students per class, maintaining an average student grade of 90% across all courses.
- Refined curriculum by identifying and rectifying deficiencies, which contributed to an increase in student comprehension and engagement levels.

Freelance Web Developer | 100 Devs Agency

December 2020 - August 2023, Sacramento, CA

100Devs is a free SWE Bootcamp that aims to help trainees find their first customers and talk to funders.

- Partnered with a diverse clientele to deliver modernized and responsive websites, leveraging a tech stack including HTML, CSS, JavaScript, and Python, alongside frameworks such as React, Node.js, Django, and Bootstrap.
 - Orchestrated all phases of production, from conceptualization to deployment, ensuring seamless project delivery and client satisfaction.
 - Continuously enhanced and maintained websites post-launch, implementing new features and updates as per client requirements, resulting in a ~45% increase in client retention and satisfaction rates.
 - Focused on empowering local businesses to establish a robust online presence, simplifying the development process and providing educational support to maximize client value and engagement.
-
